# Meet Dash

Dash is a real robot, charged and ready to play out of the box. Responding to voice, navigating objects, dancing, and singing, Dash is the robot you always dreamed of having. Use Wonder, Blockly, and other apps to create new behaviors for Dash — doing more with robotics than ever possible. No books or camps needed!

# There are no limits to what your child can do with Dash

There's a Dash app for every age group, learning level, and play style.

Wonder

**For ages 6+**

Wonder makes robotics as delightful as finger painting. A picture-based coding language built for kids, children create detailed behaviors for Dash, creating the robot pet, pal or sidekick of their dreams.
## Blockly

**For ages 6+**

Designed for children aged 6 and above, Blockly introduces advanced concepts of coding through playful projects and puzzles. Exploring variables, events, conditionals and more, Dash becomes a dancer, adventurer, artist and prankster, powered by kid's code.

## Path

**For ages 6+**

With Path, kids start with the fundamentals of robotics and coding before they can read! Drawing a route on their tablet or smartphone, children send Dash on journeys around the house with their code.

## Go

**For ages 6+**

Give Dash a new name, spin in a circle, blink a robot eye and more! Exploring the robot's lights, sounds, sensors and movements, Go is the first step to getting to know all that Dash can do.

## Xylo

**For ages 6+**

Program Dash to be a musical performer with Xylo. Used with Xylophone accessory, kids can program Dash to play their favorite song or make new tunes of their own.
